DIRECT PRIME
DTM 2K Urethane Primer Surfacer

VOC 2.1
MIX 4:1

- SUPERIOR ADHESION OVER BARE METAL SUSTRATES
- OUTSTANDING CORROSION RESISTANCE
- EASY TO SAND, WET OR DRY
- HIGH BUILDING, WITH GOOD FILLING QUALITIES
- COMPLIANT FOR USE IN ALL AREAS OF ALL STATES

DIRECT PRIME is a 2.1 VOC 2K urethane primer surfacer designed for overall repair and refinish work over a wide variety of bare metal substrates including steel, galvanized steel and aluminum, as well as factory-finishes, body filler, fiberglass and more.

Developed for excellent adhesion and sandability, this primer system also provides outstanding corrosion resistance. DIRECT PRIME dries with no waxy skin to break through, so it sands easily wet or dry.

Suitable for use over steel, properly prepped aluminum, fiberglass, body fillers and existing finishes. Available in Gray (UP742). Mixes 4:1 with UPC74 Activator.
