EC325 Matte Urethane Clearcoat is a premium-quality acrylic urethane system that dries to an even, smooth matte finish, making it an ideal choice for custom refinish and other applications where a reduced gloss is required. This easy-to-use material features exceptional flow and leveling as well as superior transparency, allowing the base color to show through.

In addition to its pleasing esthetic characteristics, Kirker’s Matte Urethane Clearcoat also provides superior protection against weathering, chemicals and harmful UV. It also features exceptional flexibility, with superior scratch, chip and mar resistance.

EC325 may be used over Kirker’s ULTRA-GLO single-stage urethane colors, SPECTRA Series urethane candy colors, or other manufacturer’s color systems. For greater versatility, Matte Urethane Clearcoat may be intermixed with EC100 PRO FLO urethane clear at different ratios for different finishes ranging from matte to high semi-gloss.

- National Rule Compliant
- Very user friendly
- Fast drying, fast delivery
- Smooth satin finish
- Zero color distortion
- Long-lasting durability
- Excellent chemical and chip resistance

**TECHNICAL DATA SHEET**

**MATTE FINISH URETHANE CLEARCOAT**

COATING TYPE:
Urethane Clearcoat

PRODUCT CODE:
EC325

ACTIVATORS:
0065
0075
0085

WEIGHT PER GALLON:
7.74 lbs

PACKAGE MEASURE:
1 US Gallon / 128 fl. oz. / 3.785 Liters

RTS VOC:
National Rule Compliant (will not exceed 4.8 lbs/gallon)

RTS Viscosity:
17-19 seconds, #2 Zahn cup

**SURFACE PREP**

If applying clearcoat to existing finish, remove all traces of wax, grease, silicone, oil and other contaminants with detergent wash, followed with a solvent wash (such as Kirker’s 650 Wax & Grease Remover). Sand existing finish to abrade with 600-800 grit. Re-clean with final wash cleaner (such as Kirker’s 600 Surface Wash).

MATTE FINISH Urethane Clear may be applied wet-on-wet over basecoats and single-stage urethane topcoats after sufficient flash time (approximately 15-20 minutes). If applying clearcoat to newly applied (but cured) paint, sand with 800 grit before recoating to ensure sufficient adhesion.

If using EC325 for partial refinish or repair work, be sure to mask all adjacent panels to prevent dry overspray.
MIXING
Mix ratio: 4:1 by volume. Thoroughly mix four (4) parts MATTE FINISH Urethane Clearcoat (EC325) with one (1) part Urethane Clearcoat Activator (0065, 0075 or 0085).

TO MIX
CLEAR 10 oz 25 oz 35 oz
ACTIVATOR 8 oz 20 oz 28 oz

Additional reduction is not recommended for this system.
Always choose the appropriate activator based on the anticipated shop temperature and other conditions at the time of application.

Below 70°
FAST/Small jobs
0065
70-80°
MEDIUM
0075
Above 80°
SLOW/Big jobs
0085

If necessary, Kirker’s Fish Eye Eliminator (UFE8) may be added to the mix (1/2 fl oz. per ready-to-spray quart of ULTRA Clear).

ALTERNATE MIX RATIOS
EC325 may be intermixed with any of Kirker’s full-gloss clearcoats at different ratios for a variety of sheens to suit different needs. Following is a guide to demonstrate different blends of EC325 and EC100 PRO-FLO Urethane Clearcoat. If using any other clear, be sure both the Matte Finish Clear and full gloss clear are properly activated at the correct ratios, with the correct activators, before blending.

* Both EC325 and EC100 use 0065, 0075 and 0085 Activators

POT LIFE
Approximately two hours at 70°F.
Mix only as much material as is needed to complete the immediate job.

GUN SETTINGS

<table>
<thead>
<tr>
<th>GUN TYPE</th>
<th>TIP SIZE</th>
<th>AIR PRESSURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conventional Siphon</td>
<td>1.4-1.6 mm</td>
<td>45-55 psi</td>
</tr>
<tr>

<tr>
<td>HVLP</td>
<td>1.3-1.4 mm</td>
<td>8-10 psi</td>
</tr>
</tbody>
</table>

Always refer to gun manufacturer’s recommendations for additional details on suggested tip size, air pressure and other adjustments.

APPLICATION
Apply EC325 in two (2) medium wet coats as necessary to achieve the desired build, allowing ten (10) minutes flash time between coats (+/- depending on air flow and temperature).

DRY TIMES

<tr>
<td>Decal:</td>
<td>48 hours</td>
<td>20 minutes after cycle</td>
</tr>
</tbody>
</table>

Air dry times may vary slightly depending on shop temperatures, airflow and total film thickness. All dry times listed are approximate, at 70-75°F.

RECOAT WINDOW
EC325 should not be recoated more than one hour after the completion of the previous coat. If more than one hour has elapsed, wait 6-8 hours (depending on air flow and temperature) before recoating. After 18 hours, EC100 may be recoated, but only after the surface has been abraded with 600-800 grit sandpaper to promote sufficient adhesion.

POLISH
DO NOT sand, polish and/or wax this clearcoat. Doing so will increase the gloss, changing the appearance of the finish.

CLEANUP
Close all containers tightly after each use. Clean gun and spray equipment with Kirker’s VOC Compliant Gun Wash (670) or other appropriate solvent products immediately after application to prevent damage.

HEALTH / SAFETY
THIS PRODUCT IS INTENDED FOR USE BY PROFESSIONALS ONLY. READ ALL WARNINGS ON ALL LABELS BEFORE USING.

This product is designed to be mixed with other components. Mixture will have hazards of all components. Before opening the packages, read all warning labels. Follow all precautions. See Safety Data Sheet for additional health and safety information.

WARRANTY
All recommendations for the use of Kirker products are based on tests and experience believed to be reliable. Since the methods of use, conditions of application, and the application itself are beyond our control, product warranty is restricted to replacement of material only. No other warranty, written or oral, is expressed or implied.
